Circular

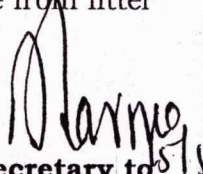

Subject: **Maintenance and aesthetic upkeep of the campus and the research field plots-reg**

As we continue to strive for excellence in academic and research endeavors, your kind attention is invited to an important aspect of our campus environment: the aesthetic upkeep of our field plots, lawns, lanes and drains. The University field plots serve not only as practical spaces for conducting experiments and research but also as visual representations of our dedication to scientific advancement and environmental stewardship.

However, in recent times, the competent authority has observed a noticeable decline in the aesthetic quality of these areas; overgrown vegetation, untidy pathways, and litter accumulation, which detract from the overall appeal and functionality of these spaces. Maintenance/aesthetic upkeep of University field plots, lawns, lanes and drains is crucial for professional image, safety and accessibility, environment responsibility and research integrity.

In light of the above and ensuing rainy season, I am directed to humbly request you to prioritize the maintenance of our field plots, lanes and drains. This may include regular mowing, trimming of vegetation, clearing of pathways, drainage and implementing waste management measures to keep the area clean and free from litter and obnoxious weeds.

The matter may please be treated as **most Urgent**.

Secretary to
Vice-Chancellor
